RE: Boiler Protection Maushop Village

Dear Bill,

Fuller Electric Company will furnish and install a Voltage Sensor Relay with a Surge Capacitor on Boiler Circuit, This unit will be installed next to boiler.

**Information:**

A Voltage Sensor Relay detects under voltage and over voltage to open circuit to Boiler voltage settings are set between 110volt Low end to 150volts high end.

Surge Capacitor, conduct current at normal voltage continually, therefore there is no time delay, response time is zero, a capacitor will react to any increase in Voltage. While it is not possible to achieve 100% protection surge capacitors Will greatly reduce problems due to lighting, power surges and voltage spikes.

Fuller Electric Company's cost to Furnish and Install is **\$ 580.00 C.O. D.**

Please call if you have any questions. Hopefully we can be of service to you.

Respectfully,

Richard Kermenski  
Service Manager
